

# BIG ECOSYSTEM

## WHITEPAPER

UNITING CRYPTO ONE ECOSYSTEM ENDLESS POSSIBILITIES

## Information and Disclaimer

This white paper provides a comprehensive overview of the Big Ecosystem project, including the vision, mission, strategic approach, and details of the Connect (CNCT) token. It delineates the business objectives, project functionality, and the ecosystem's societal contributions. Specifically, the document addresses the challenges within the cryptocurrency community and offers tailored solutions through Big Ecosystem's product offerings, detailed tokenomics, and planned future developments.

The white paper emphasizes that it does not constitute a prospectus, and its contents should not be interpreted as financial advice. It includes forward-looking statements concerning the project's goals and developmental trajectory, intended as expressions of future intent rather than legally binding promises. Given the cryptocurrency sector's emergent and often unpredictable nature, Big Ecosystem expressly clarifies that it cannot be held liable for any losses or risks that arise due to smart contract vulnerabilities, market volatility, or other inherent risks in the crypto sector.

By reading this document, investors can gain insights into how Big Ecosystem plans to unify and enhance the cryptocurrency landscape by leveraging the Connect token to facilitate utility usage and interactions within its platform.

## Overview

At Big Ecosystem , we proudly present an innovative and powerful platform designed to unify crypto's most advanced technologies and communities. Our mission is unwavering to deliver a comprehensive, user-friendly environment providing access to a wide range of top-tier crypto products and services. We offer cutting-edge trading signals, in-depth market analysis tools, and future strategic partnerships with robust portfolio management projects, state-of-the-art security solutions, and seamless utility integrations. With Big Ecosystem , you can confidently navigate the complex world of cryptocurrency, armed with the tools you need for success.

We firmly believe that access to the best tools and technologies should never compromise usability or security. Through seamless integration of state-of-the-art technologies and intuitive interfaces, we offer unparalleled functionality without sacrificing user experience. Whether you are a newcomer learning the basics of cryptocurrency, an experienced trader seeking advanced market insights, or a professional needing reliable security solution, Big Ecosystem has covered you in the ever-evolving digital landscape.

In the dynamic world of cryptocurrency, you are seen as an integral part of our community at Big Ecosystem . Our platform prioritizes your needs and safety, empowering you to join us in building a unified, collaborative, and secure crypto ecosystem. We welcome you to Big Ecosystem , where your crypto journey is simplified and empowered.

## Abstract

Big Ecosystem is committed to revolutionizing the crypto space by establishing a unified platform to provide users access to industry-leading technologies and resources. As the cryptocurrency market expands rapidly, attracting millions of new users monthly, the necessity for a consolidated and user-friendly platform becomes increasingly evident.

The adoption of cryptocurrencies is accelerating at an unprecedented pace, with millions of new users entering the market each month, driven by the allure of financial independence, innovative technology, and the potential for high returns. This surge in new participants highlights the critical need for a platform that offers advanced tools and resources, ensuring a seamless and secure user experience. By uniting millions of users globally, Big Ecosystem aims to bridge the gap between cutting-edge crypto technologies and the average user. Our platform will provide a comprehensive suite of tools and products to make crypto investments safer, more secure, and easier to manage. These include advanced trading signals, in-depth market analysis tools, robust portfolio management systems, and state-of-the-art security solutions.

Our vision is to become the primary platform for both beginners and seasoned professionals in the cryptocurrency arena. For newcomers, Big Ecosystem provides educational resources, tutorials, and support, helping them navigate the complexities of the crypto world. For the more experienced, we offer sophisticated tools and integrations that enhance trading efficiency and security. Additionally, Big Ecosystem is committed to stimulating the CNCT token economy through revenue-sharing, buybacks, and burns, ensuring tangible benefits for the community. Founded on the principles of community and collaboration, we believe the strength of a crypto platform lies within its community. Therefore, Big Ecosystem actively fosters a collaborative environment where users can share insights, learn from one another, and contribute to the platform's ongoing enhancement.

## Introduction

The need for a streamlined and secure platform is increasingly evident as the cryptocurrency market continues to expand rapidly, attracting many participants, from novices to seasoned investors. Big Ecosystem steps into this space with a revolutionary approach, aiming to consolidate fragmented resources into a unified, user-friendly platform. Designed to cater to all levels of crypto experience, it integrates crucial technologies to facilitate easy access to various tools, from advanced trading signals and in-depth market analysis to robust portfolio management and leading-edge security solutions. This initiative transcends mere functionality; it fosters a vibrant community where collaboration and shared insights lead to collective growth and enhanced security. By breaking down barriers within the crypto world, Big Ecosystem democratizes access and improves safety, ensuring users can confidently and easily navigate and leverage the digital finance landscape.

## Mission

Our mission at Big Ecosystem is to develop a comprehensive ecosystem as a one-stop hub for all essential cryptocurrency products and services. We are dedicated to fostering a community-driven environment that promotes collaboration and innovation, enhancing the overall strength and accessibility of the crypto space. By catering to newcomers and seasoned professionals, we aim to bridge the market's gaps and provide a smooth, intuitive crypto experience. Our goal is to simplify the complexity of navigating the cryptocurrency world, ensuring that every user, regardless of their level of expertise, has the resources and support needed to thrive in this dynamic industry.

## Challenges and Problems

The cryptocurrency landscape is currently a patchwork of disparate platforms and services, requiring users to juggle multiple interfaces and tools to meet their needs. This scattered framework introduces inefficiencies, compounds security vulnerabilities, and steepens the learning curve for newcomers trying to find their footing in this complex domain. For seasoned professionals, the lack of a unified platform can result in excessive expenditure of time and resources as they navigate through various systems to manage their assets effectively. Moreover, the prevailing siloed nature of projects within the crypto industry often stifles potential synergies, ultimately impeding growth and enhancing vulnerabilities in the sector. This fragmentation emphasizes the critical need for a more integrated and collaborative approach to reshape the infrastructure of the cryptocurrency environment.

## Solution

Big Ecosystem tackles the existing fragmentation in the cryptocurrency market by establishing a cohesive platform that combines top-tier technologies and services. This integrated approach simplifies the management of crypto assets and enhances user experience by providing a streamlined and intuitive interface. Our focus on fostering community and promoting collaborative efforts is pivotal in improving user engagement and participation. By uniting various facets of the crypto world, Big Ecosystem ensures users have easy and secure access to all necessary tools and resources.

## Ecosystem Overview

Big Ecosystem will connect millions of users worldwide, offering a wide range of products and services that simplify and secure the crypto journey. The platform will feature exclusive partnerships with top projects, ensuring users have access to the best technologies in the industry. We aim to create an all-in-one platform where users can find everything they need, from market analysis tools to security solutions, making their crypto journey more efficient and secure.

## Ecosystem Products

- **Big Signals:** Advanced trading signals help users make informed decisions and stay ahead in the market. Our platform provides real-time analytics and predictive insights that enable users to make strategic trading moves and optimize their investment outcomes.
- Market Analysis Tools
- Portfolio Management
- Security Solutions
- Utility Integrations

Each of these components is designed to enhance the functionality and efficiency of our ecosystem, ensuring that users have access to the necessary tools to manage and grow their investments effectively. While specific details and partnerships are still being finalized, the overarching goal is to provide a robust and comprehensive suite of services that cater to the diverse needs of the crypto community.

## Big Signals

Big Signals offers a service that integrates technical chart analysis directly into Telegram groups for any cryptocurrency token. It is designed to enhance the trading experience by providing real-time buy signals and market insights, allowing users and their communities to discuss and act on these signals promptly.

### Overview of Big Signals

Big Signals functions primarily through its integration with Telegram, where it delivers automated trading signals and technical analysis. This helps users to make informed decisions based on market movements and trends. The platform's use of Telegram groups facilitates community-based discussion and decision-making, making trading a more interactive and collaborative process.

### Use Cases of Big Signals

**Real-Time Trading Signals:** Users receive immediate trading signals within a designated Telegram group, which can significantly benefit day traders and those looking for timely market entries and exits.

**Community Interaction:** By providing a platform for discussion within Telegram groups, Big Signals fosters a community environment where traders can share insights, strategies, and real-time reactions to market changes.

**Educational Tool:** For newer traders, Big Signals serves as an educational resource by exposing them to technical analysis and real-time trading scenarios from which they can learn.

## Big Signals Pricing and Access

Big Signals offers different tiers of service, including an almost free option with basic features and higher tiers that require holding a certain amount of \$CNCT tokens. These tiers located on page 15 provide additional features like support for multiple token subscriptions per group and enhanced group member capacity. Access to the premium features (Big Signals Pro) requires users to verify their token holdings through a DAPP, which integrates with their crypto wallets like MetaMask.

For further details, you can visit our Ecosystem or view their documentation on GitBook for more comprehensive information and setup guides.

## Educational Platform

The Educational Platform within Big Ecosystem is strategically designed to be a pivotal resource for individuals at every level of their cryptocurrency journey. As the platform evolves, it will offer a broad range of educational content tailored to beginners and seasoned users. This future-focused curriculum will cover essential topics, from the basics of blockchain technology to sophisticated investment strategies, equipping users to navigate the complexities of the crypto market confidently.

Key planned features of the platform include interactive tutorials and expert-led video lectures, which will be constantly updated to reflect the newest trends and insights from the cryptocurrency world. This ensures that learners always have access to the most current information, making their educational experience relevant and practical. Big Ecosystem aims to foster a well-informed community of crypto enthusiasts and professionals by providing these comprehensive educational tools. The platform's ultimate goal is to empower users, enabling them to make informed decisions, manage risks effectively, and optimize their investment strategies. This is done within a supportive and enriching online environment, where every user is valued and part of a larger community.

### Educational Platform Content:

- **Beginner Guides:** Introduction to cryptocurrencies and blockchain technology, helping new users understand the basics.
- **Advanced Courses:** In-depth analysis and strategies for experienced users, providing them with the tools to succeed.
- **Webinars and Tutorials:** Interactive sessions with industry experts, offering valuable insights and knowledge.
- **Community Forums:** Platforms for users to share knowledge and experiences, fostering a collaborative learning environment.

## Network Academy

The Network Academy within Big Ecosystem is envisioned as a vibrant community hub where users from various backgrounds can connect, learn, and collaborate on many topics related to cryptocurrency, business, and lifestyle. This academy is designed to serve as a dynamic platform for networking and knowledge exchange, facilitating the building of valuable connections that extend across global boundaries.

### Network Academy Content

- **Discussion Forums:** These are spaces for discussions and interactive environments that encourage users to share their ideas and insights. From the technical aspects of blockchain technology to broader lifestyle and business implications, these forums foster a community of learning and mutual support.
- **Networking Events:** These are not just events but strategic opportunities to expand your professional network. They connect you with peers, industry leaders, and potential collaborators, opening up new avenues for cooperation and growth within the crypto space. The Network Academy will be a place to exchange knowledge and a breeding ground for innovation and collaboration. By participating in this academy, members can stay at the forefront of the latest trends and developments, ensuring they remain well-informed and connected within the rapidly evolving crypto industry. Through these initiatives, Big Ecosystem aims to empower its users with the tools and connections needed to succeed in cryptocurrency's diverse and dynamic world.

## Pricing Model

In the evolving landscape of Big Ecosystem , we've designed a sophisticated, tier-based access system that caters to a diverse range of users, from cryptocurrency novices to seasoned professionals. Our system offers varied levels of engagement and utility, ensuring inclusivity and flexibility across our offerings.

### Tier Definitions:

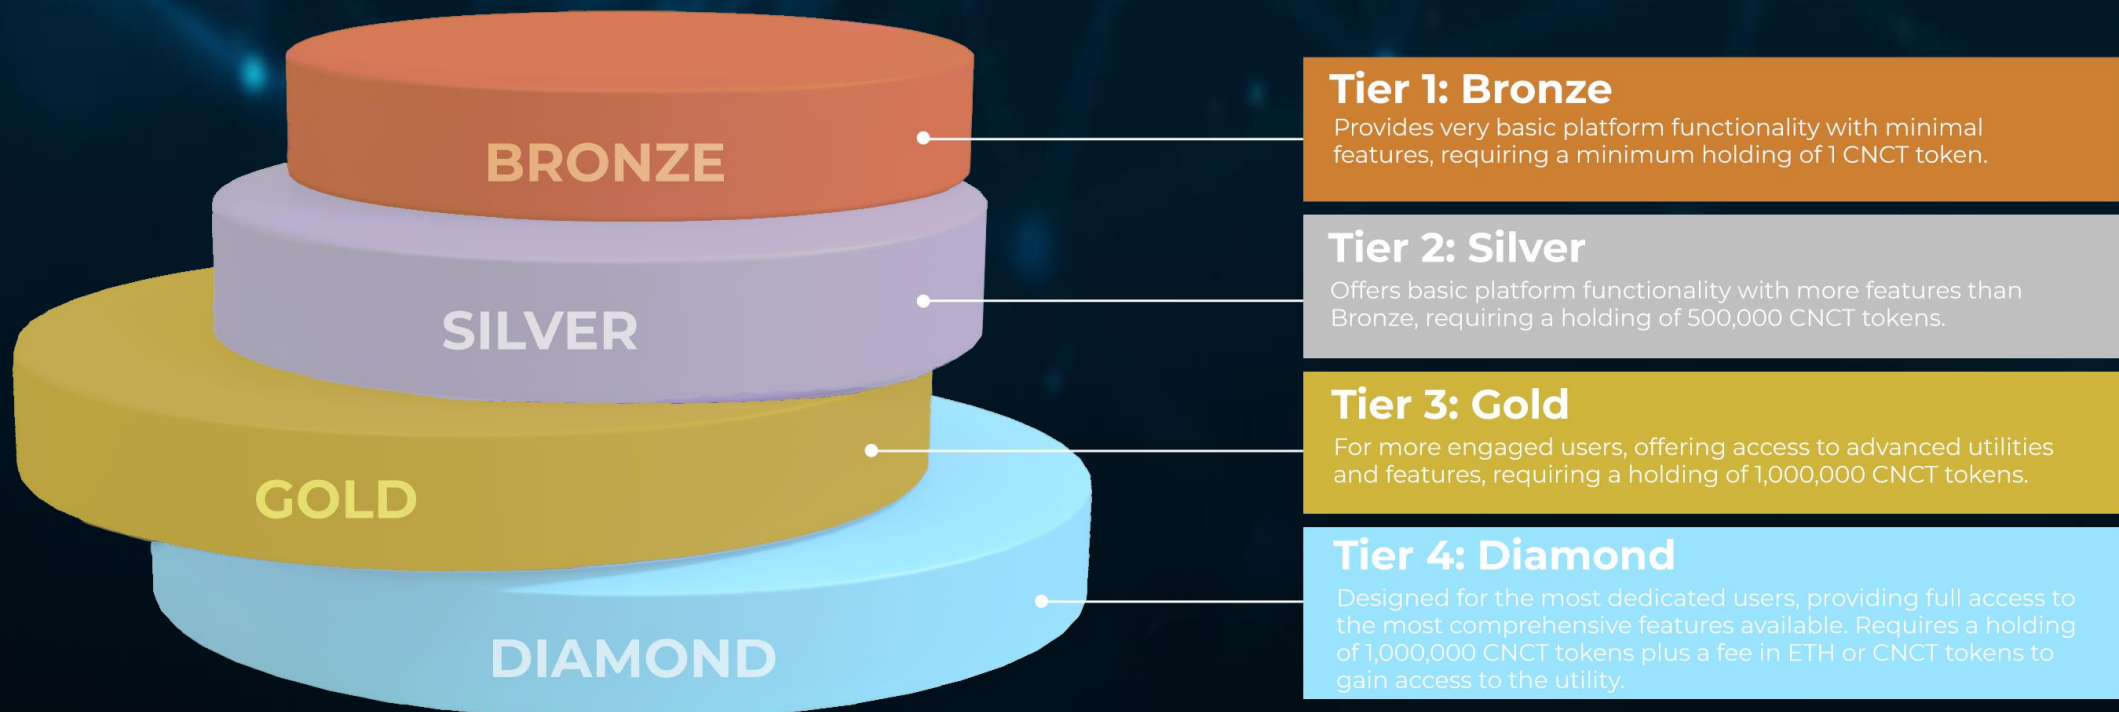

- **Bronze Tier:** Provides very basic platform functionality with minimal features, requiring a minimum holding of 1 CNCT token.
- **Silver Tier:** Offers basic platform functionality with more features than Bronze, requiring a holding of 500,000 CNCT tokens.
- **Gold Tier:** For more engaged users, offering access to advanced utilities and features, requiring a holding of 1,000,000 CNCT tokens.
- **Diamond Tier:** Designed for the most dedicated users, providing full access to the most comprehensive features available. Requires a holding of 1,000,000 CNCT tokens plus a fee in ETH or CNCT tokens to gain access to the utility.

**Dynamic utility pricing:** Adjustable 1 week, 2 weeks, 1 month, and every quarter after launch to meet a specific threshold.

## Pricing and Token Holding Requirements:

- **Subscription Fees:** No fees for the first utility, Big Signals; utilities in the Diamond Tier will require a fee alongside the necessary token holdings for tier access.
- **Token Holding:** Mandatory holdings increase for higher tiers, enhancing the intrinsic value of CNCT and ensuring deep integration into our services.
- **Payment Options:** Fees for utilities following Big Signals can be paid in either ETH or CNCT, with flexibility to accommodate user preferences.
- TIER 1 "Bronze" (1 token observable)
- TIER 2 "Silver" (5 tokens observable)
- TIER 3 "Gold" (Unlimited (100) tokens observable)

## Example Scenarios for Accessing Utilities in Big Ecosystem

Example 1: Imagine a user who already holds 500,000 CNCT tokens, granting them Gold Tier access to Big Signals at no additional cost beyond the token purchase. When Project X is introduced to the ecosystem with a Premium Tier only, requiring a fee of 0.05 ETH and 1,000,000 CNCT tokens for access, the user will need to acquire an additional 500,000 CNCT tokens to meet this requirement. Once the user has a total of 1,000,000 CNCT tokens, they will use the fee bot to pay the 0.05 ETH fee. This payment grants the user access to the Premium Tier of Project X, and since they now meet the token requirements for Premium Tier in Big Signals, they gain upgraded access without any further fees.

Example 2: Another user already possesses 1,000,000 CNCT tokens, providing them with Premium Tier access in Big Signals, which requires no additional fee. Upon the launch of Project X in the ecosystem, which also features a Premium Tier access, the user wishes to utilize this new bot. After making the payment, they gain access to Project X's Premium Tier utility. Since they already meet the token holding requirement for the Premium Tier, they simply need to pay the associated fee of 0.05 ETH for Project X using the fee services, utilizing their existing token holdings for seamless integration into the new utility.

## Token Utility Mechanisms

### Buyback and Burn Mechanism

- **ETH Payments:** If user opts to pay in ETH, 50% of the fee is used for CNCT token buybacks and burns, reducing token supply and potentially increasing its value. The remaining 30% is distributed to qualifying CNCT token holders, while 20% goes to the development wallet for sustainable growth.
- **CNCT Payments:** Similarly, if paid in CNCT, 50% of the token amount is burned, enhancing the token's scarcity and value. The revenue-sharing and development wallet allocation are the same as with ETH payments.

### Educational Platform and Network Academy

- **Access Requirements:** Additional platforms, such as the Educational Platform and Network Academy, may require users to maintain a specific CNCT token balance alongside a manageable monthly fee.
- **Revenue Allocation:** For Network Academy fees, 25% of collected fees contribute to further CNCT buybacks and burns, while the remaining 75% supports development and operational costs.

## Dynamic Pricing Strategy

- **Adaptive Token Requirements:** Token requirements for each tier are adjustable based on CNCT's market value, ensuring reasonable access costs relative to price movements.
- **Promotional Offers:** Periodic promotions offer reduced subscription rates, encouraging long-term engagement and more significant investment in the platform.

## Benefits for Multiple Utility Subscriptions

- **Bundled Offers:** Discounts for users subscribing to multiple services within Big Ecosystem enhance the value and attractiveness of comprehensive platform use.
- **Consolidated Token Holdings:** A unified token requirement across various utilities simplifies the user experience and maximizes the utility of holding CNCT tokens.

## Utility Access and Authentication Process

To streamline access to upcoming utilities within Big Ecosystem, we plan to establish a comprehensive, automated process that ensures both payment and token verification are user-friendly and secure. Currently, only wallet-holding validation using MetaMask is available. The fee bot process, intended for future utilities, is under development and is expected to follow a process similar to the one outlined below, though it may employ different mechanisms or steps. This process will be implemented starting from the second utility and will be detailed at the time of integration.

### Future Automated Fee Payment and Token Verification Process:

- **Token Holding Verification:** Users start by validating their token holdings corresponding to the required tier of the utility (e.g., Project X) using a secure wallet interface such as MetaMask on the utility page in our ecosystem. This step ensures that the user holds the necessary number of CNCT tokens and that they belong to the Diamond tier before proceeding.
- **Communicate with our Dedicated Fee Bot:** After successful token validation, users will communicate with the fee bot and follow the instructions.
- **Utility Selection via Telegram Bot:** Users will choose the desired utility through the dedicated fee bot on Telegram.
- **Payment Instructions and Window:** The bot will issue specific payment instructions, providing a unique wallet address. Users will have a 15-minute window to complete the payment, ensuring prompt and secure transactions.
- **Fee Payment:** For Diamond Tier utilities requiring a fee, such as Project X, users must pay a one-time fee (e.g., 0.05 ETH) to a designated wallet the bot provides. This fee is critical for accessing enhanced features of that specific utility.
- **Access Granting:** Upon successful payment verification and token validation, users will gain lifetime access to the utility. Access is maintained once the requisite number of tokens is held, enhancing long-term user engagement and investment in the ecosystem.

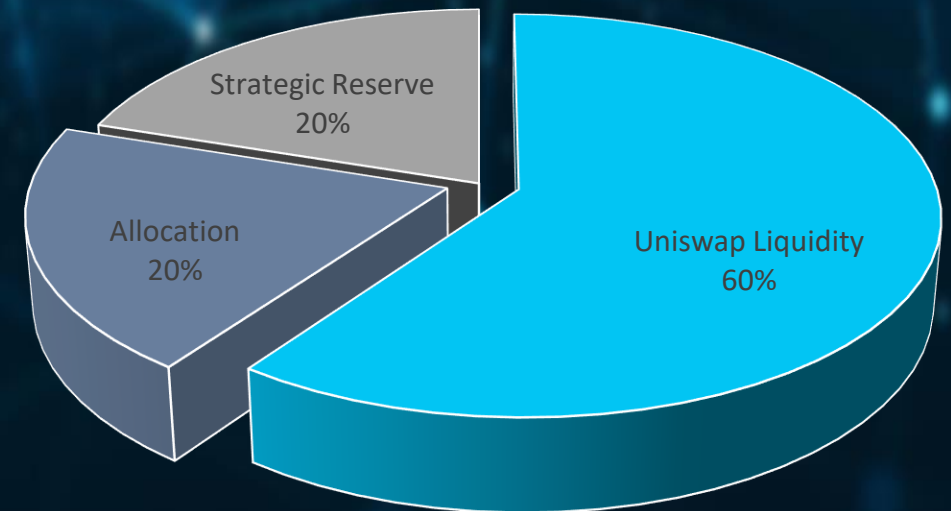

## Tokenomics

The tokenomics of the Big Ecosystem is centred around its Connect (CNCT) token, which is structured to support both the platform's growth and the benefits to its stakeholders. Here's a breakdown of how the tokens are allocated and utilized:

- **Chain:** Ethereum
- **Initial Liquidity:** 2 ETH
- **Ticker:** \$CNCT
- **Contract Address:** 0x516D339afA72f6959b8E06a31FBc32Da3E49348B
- **Total Supply:** 100.000.000 (18 Decimals)
- **Liquidity on Uniswap:** 60% of the tokens, which equates to 60 million CNCT, will be added to the Uniswap liquidity pool. This significant allocation to liquidity ensures a stable and healthy trading environment for users, facilitating smoother transactions and price stability.
- **Allocation:** 20%. See allocation breakdown on the next page.
- **Strategic Company Reserve:** 20%. See allocation breakdown on the next page.

## Distribution

## Breakdown

**20% Allocation Reserved for Team, Marketing, and Liquidity:** This portion is allocated to support the foundational aspects of the platform, including team incentives, marketing campaigns to boost platform adoption, A part of this allocation also supplements liquidity, further enhancing the token's market presence.

**20% Strategic Company Reserve:** This portion will be directly locked after contract deployment and before the activation of the trade. The 20% will cover further development, exchange listings, liquidity for expansion (including the Network Academy, Educational Platform, and new ideas), staking possibilities, and burn when needed.

### 5% Buy/Sell Tax is imposed on all buy and sell transactions

- **3% for Team and Development:** This fee funds ongoing development and operational costs, ensuring the platform continues innovating and improving.
- **1% for Buyback:** This portion of the tax is used to buy back CNCT tokens from the market. This mechanism reduces the overall supply, potentially increasing the token's value over time.
- **1% for Marketing:** This fee supports marketing efforts, which are crucial for the platform's growth and sustainability by attracting new users and maintaining high levels of engagement.

## Tokenomics Summary

Chain: Ethereum

Initial Liquidity: 2 ETH

Ticker: CNCT

Contract Address: 0x516D339afA72f6959b8E06a31FBc32Da3E49348B

Total Supply: 100.000.000 (18 Decimals)

- **Liquidity on Uniswap: 60%**
- **Allocation Breakdown: 20%**
- **Strategic Company Reserve: 20%**
- **Buy/Sell Tax: 5%**
  - 3% for Team and Development
  - 1% for Buyback
  - 1% for Marketing

## Future Developments

Big Ecosystem is steadfast in its commitment to leading technological innovation within the cryptocurrency sector. As part of its ongoing development, the platform is set to broaden its range of products and services significantly. These enhancements will be guided by continuous community feedback and align with the latest trends in the industry, ensuring the ecosystem remains responsive and relevant to its users needs. Such developments are designed to introduce more sophisticated tools and functionalities, further empowering users, enhancing user engagement, and contributing to a more robust and dynamic ecosystem. By adapting to user needs and technological advancements, Big Ecosystem aims to expand its platform and significantly contribute to the broader cryptocurrency community.

## Detailed Roadmap

### Phase 1: Foundation and Conceptualization (Q1-Q2 2024)

- **Research and Development:** Focus on market analysis and initial concept development.
- **Building Community:** Leverage social media and other platforms to build early interest and community around Big Ecosystem .
- **Creating an Identity:** Develop and deploy branding materials like logos, animation videos, and custom stickers.
- **Soft Marketing Initiatives:** Initiate content marketing and engagement strategies.
- **Choosing KOLs and Marketers:** Identify and engage with key influencers and marketers.

### Phase 2: Pre-Launch and Initial Development (Q2-Q3 2024)

- **Platform Design and Prototyping:** Finalize the design and begin prototyping the Big Ecosystem platform.
- **Strategic Partnerships:** Form initial partnerships with key industry players.
- **Contract Creation:** Develop essential smart contract.
- **Marketing Preparations:** Ramp up marketing efforts to prepare for launch.
- **Alpha/Beta Testing:** Begin testing phases with community involvement for feedback.
- **Website Launch**

### Phase 3: Launch and Initial Expansion (Q3 2024)

- **Contract Deployment:** Before the token launch, deploy the essential smart contract to ensure all blockchain interactions are secure and functional.
- **Official Platform and Token Launch:** Launch the Connect (CNCT) token and Big Ecosystem platform with key features and initial utility offerings (July/August 2024).
- **Integration of Big Signals:** Integrate advanced trading signals into the platform (July 2024).
- **Big Marketing and Partnership Announcements:** Execute a comprehensive marketing strategy and announce strategic partnerships at launch (July/August 2024).
- **New Product Development:** Start the development of another significant product by Big Ecosystem DEVs.
- **Addition of New Projects to the Ecosystem:** Introduce more projects currently under development or partnerships to the ecosystem, ensuring continuous growth.

### Phase 4: Further Development and Growth (Q4 2024 - Q2 2025)

- **Continued Community Engagement and Feedback Incorporation:** Maintain high levels of community involvement and continuously refine platform offerings based on user feedback.
- **Adds integration:** Explore adding Adds in the Big Signals bot.
- **Global Partnerships:** Expand to form global partnerships that extend the reach and functionality of Big Ecosystem .
- **Development of Network Academy:** Begin creating the Network Academy to foster community interaction and learning (Q1 or Q2 2025).
- **Introduction of Additional Projects:** We will continue integrating more projects into the ecosystem, enhancing the range of available services and tools.

## Phase 5: Long-Term Innovation and Scaling (Q2 2025 and beyond)

- **Development of Educational Platform:** Finalize and launch an educational platform that offers comprehensive learning tools and resources for crypto enthusiasts (Q2 2025).
- **Sustainable Growth and New Features:** Continue to grow the ecosystem sustainably by introducing innovative features and enhancing existing functionalities.
- **Confidential Development:** Explore the possibility of developing something confidential that will help to optimize transaction processes and security (Long-term confidential plan).

## Future Aspirations

- **Decentralized Governance:** We should move towards a more decentralized governance structure, giving the community and token holders more control and influence.
- **Continual Adaptation and Enhancement:** To remain at the forefront of the crypto industry, Big Ecosystem must remain adaptable and responsive to new technologies and market demands.
- CEX listing.

## Conclusion

Big Ecosystem is dedicated to establishing itself as the most comprehensive and user-friendly platform in the cryptocurrency space. We aim to connect millions of users worldwide, providing them with superior tools and technologies tailored to enhance their experience. Through fostering a culture of collaboration and community involvement, Big Ecosystem is committed to making the journey through the crypto world safer, more secure, and more accessible for everyone. By empowering our users and prioritizing their needs, we can transform how people interact with and benefit from cryptocurrency, setting new standards for ease of use and community support in digital finance.
